#### SA8000

The **SA8000 label** is the worldwide leading certificate for **corporate social responsibility** with strict criteria in terms of child labor, forced labor, health and safety, freedom of association, discrimination, disciplinary procedures, working hours, salary and management. Van de Velde was one of the first Belgian companies to carry this label. The same standards are demanded from all our suppliers, so we can guarantee our customers that our lingerie is produced under the best possible conditions for mankind and the environment.

#### PATENTED WIRES

Underwires covered in a **patented combination of 3 types of materials**, also used in the car industry. This prevents the wires from poking through the material, while ensuring a soft, flexible and comfortable fit.

#### AWARD-WINNING LINGERIE

Three times in a row, PrimaDonna won the award for **Best-selling European brand in lingerie stores**.

#### TESTED ON REAL WOMEN

We test all of our lingerie and swimwear on real women with different bodies and cupsizes. Thanks to their feedback we can constantly improve our fit.

#### SAFE LINGERIE

The quality of our lingerie is legendary. Colors and elasticity resist frequent washing. All our lingerie, and resources, comply with the Oeko-tex and REACH legislations.

The **Oeko-tex standard 100 label (class 2)** ensures that our products are **free of harmful substances and allergens**.

**REACH** wants to expand knowledge about chemical substances and their risks. The harmful substances in a product need to be registered and communicated to the employees and to the consumer.

We work with **European suppliers** as much as possible. Our lace finds its origin in France, the embroidery in Switzerland or Italy. Innovative microfibers come from Belgium. Sourcing close to our cutting facility is better for the environment. In addition, many of our suppliers are doing ecological efforts, such as investing in their own water purification installations.

The paper we use for our brochures and labels is **FSC** certified. This means that the paper comes from responsible sources—environmentally appropriate, socially beneficial and economically viable.
